Sec. :-"A"

SHORT TAKES

The Dark Web is the World Wide Web content that exists on darknets. Overlay networks that use the Internet but require Specific Software , Configurations , or aunthorization to access.

Internet hacking is prohibited.This is totally a disadvantage in its own nature.The good alternative to all the hackers is to do web hosting and do web development .They should put their skills in the right place.I would say the biggest disadvantage of hacking is **it is illegal**.

Cybercrime refer to illegal activities conducted through computer. It is a growing area of crime. They are mostly committed through the internet and impact banking and financial institutes. Organised criminal networks are usually behind financial crime due to the prospect of profits to be made.
