31	Number of students with Passed Division											
32	Number of Failed Students											

Q1-Prepare a result sheet

Q2-Apply appropriate conditional formatting to the cell of result column

a) Set red color if failed division

b) Set blue color if passed division

c) Set yellow color if first division

d) Set green color if distinction division

Solution to prepare result sheet

1. Total =SUM (First subject : Last Subject)
2. Result = If the marks is greater than 32 in all subjects then pass else fail.

   Percentage = (Total marks / Full marks) * 100

3. Division :

   If Result = failed then failed

   Else,

Percentage >=80 , “Distinction”

Percentage >= 60 , “First”

Else PASS

4. Calculate Rank using Rank function
5. Count number of students with Distinction division , First division , Passed Division , Failed students.

Every student must include header and footer in each solution which should contain their name and date in the header section and Faculty in the Footer Section.
